YUNG CHI
PAINT & VARNISH
MFG. CO., LTD.

About Yung Chi

Yung Chi Paint and Varnish MFG Co., Ltd. is established in 1951, and has more than 65 years of excellent and professional research development technology as its basis. The RAINBOW brand created by Yung Chi not only provides special coating needed for heavy manufacturing sectors, high tech industries and public facilities, but also produces paint for shipping vessels, colored steel coils, and fire resistant applications through international cooperation. The firm will continue to develop various kinds of coating to fulfill the ongoing and ever changing demands of varied sectors domestically and abroad.

In addition to providing stable quality paint and coating due to its skilled technology, Yung Chi also puts the concept of beautifying the space into practice with eco-friendly colors, taken into account environmental protection and the current trend. The firm promotes diverse green building coatings that are nontoxic and functional, offering a healthier and safer living environment.

All-in-one Emulsion Paint / Lock Roof Water Based Waterproof Coating / Water-based Dirt Resistance Elastic Paint

Product Introduction

Yung Chi uses 3 kinds of resin and individually mixes them with eco-friendly raw material and weather resistant paint to create: "All-in-one Emulsion Paint" that is able to apply onto the interior of the living quarters without causing harm to the human body, "Water-based Dirt Resistance Elastic Paint" that is able to protect the exterior walls, and "Lock Roof Water Based Waterproof Coating" that is able to assist the roof prevent water leakage and heat resistant. No harmful substances such as heavy metal are added within the coating, therefore it is eco-friendly and non-toxic, protecting the house and making the living environment safer and healthier.

All-in-one Emulsion Paint

All-in-one Emulsion Paint utilizes advanced top quality resin and eco-friendly and safe materials that does not have chemical odor. It is not added with chemical additives such as artificial scents and fulfills the green building materials standards. In addition, as it contains low level volatile organic compounds, it would not cause harm to the human body and greatly reduces pollution against the environment.

Mild Odor

The odor during and after construction is not repulsive

Lock Roof Water Based Waterproof Coating

Lock Roof Water Based Waterproof Coating is made from water based acrylic resin, which could be applied onto building roofs, so that it could resist against the water leakage challenges caused by the pulverization of cement or cracking. The white coating of "Lock Roof Water Based Waterproof Coating" is able to achieve 90% of TSR, which could reduce the absorption and conductivity of heat, achieving heat insulation effects.

Saving energy

Effectively lowering the indoor temperature, reducing electricity use

Water-based Dirt Resistance Elastic Paint

Water-based Dirt Resistance Elastic Paint is created by using water based acrylic resin with water resistant, alkali resistant, and weather resistant properties, and is suitable for applying onto the exterior walls of buildings. Yung Chi utilizes special surface hardening technology, allowing the product to have great dirt resistant features; the paint also holds mold-free, moss free characteristics and is not easy to pulverize nor has its colors fade away. Furthermore, the formula does not have heavy metal, thus it is quite safe.

Dustproof and easy to maintain

Dust does not stick easily, therefore able to clean and wash the wall surface effortlessly
