

GREAT ASIA MACHINERY

Professional vacuum chamber manufacturers. Currently has entered the high-tech optical and mechanical equipment design and contract manufacturing semiconductors, the next goal is focused on energy and related industries, vacuum heat treatment system professional design and manufacturing.

Professional Planning

- Pyrolysis method renewable energy equipment:
- Waste oil regeneration diesel system
- Waste plastics renewable diesel equipment

Stable Quality

Vacuum chamber and equipment design, equipment system development(Vacuum coating system, High-power electron beam melting equipment, Vacuum brazing furnace, High-temperature graphite vacuum furnace, Vacuum forming hot stove), Aerospace parts and semiconductor equipment supplies processing, customized design.
